# DETECTION OF REAL TIME THREATS, ANALYSE RECORDED TRAFFIC FILES AND IDENTIFY ANOMALIES

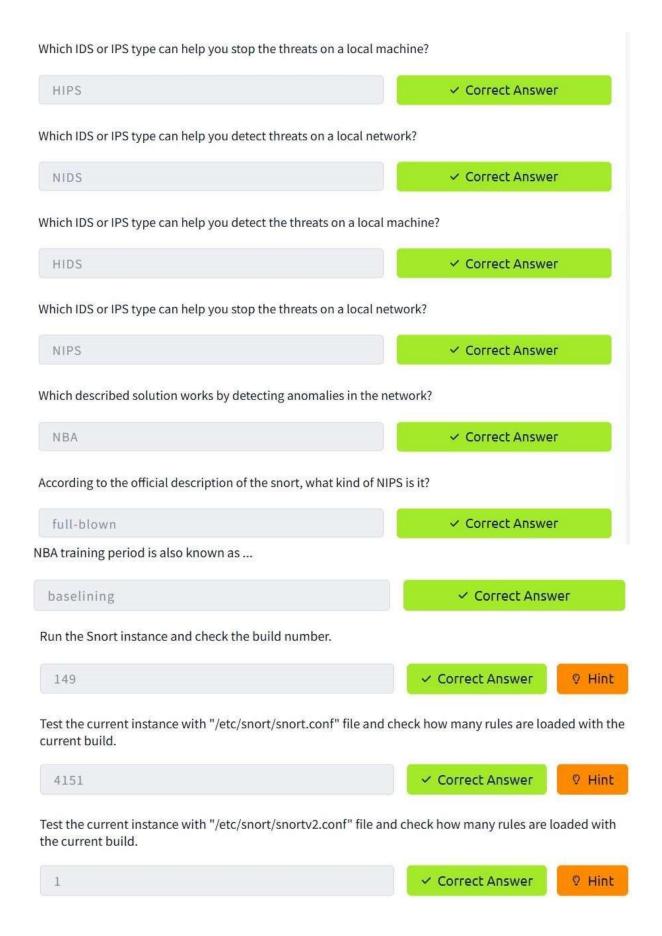

### AIM:

Learn how ton use snort to detect real time threats, analyse recorded traffic files and identify anomalies.

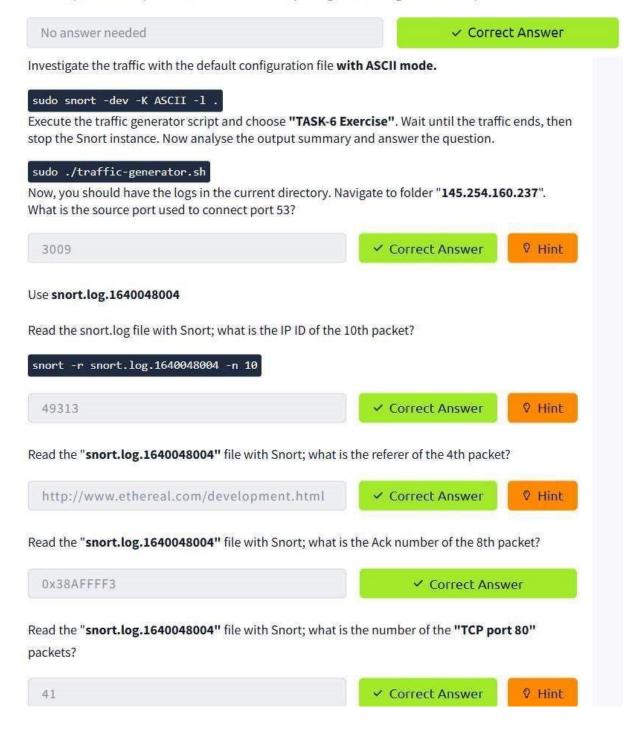

Navigate to the Task-Exercises folder and run the command "./.easy.sh" and write the output

You can practice the parameter combinations by using the traffic-generator script.

Investigate the traffic with the default configuration file.

# sudo snort -c /etc/snort/snort.conf -A full -l .

Execute the traffic generator script and choose **"TASK-7 Exercise"**. Wait until the traffic stops, then stop the Snort instance. Now analyse the output summary and answer the question.

## sudo ./traffic-generator.sh

What is the number of the detected HTTP GET methods?

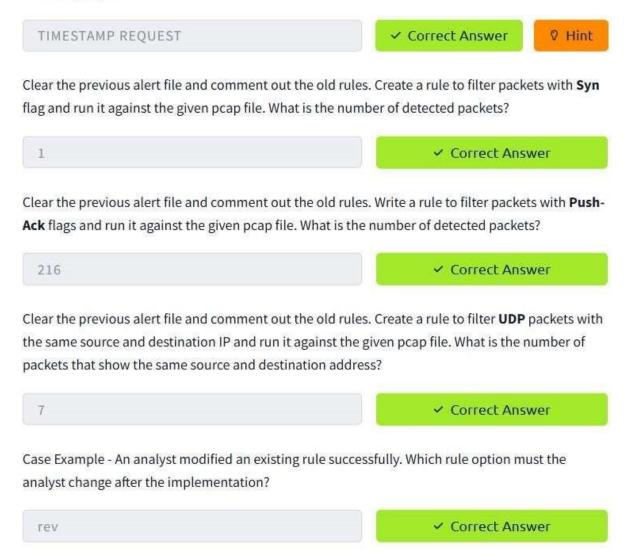

You can practice the rest of the parameters by using the traffic-generator script.

Investigate the mx-1.pcap file with the default configuration file. sudo snort -c /etc/snort/snort.conf -A full -l . -r mx-1.pcap What is the number of the generated alerts? ✓ Correct Answer 170 Keep reading the output. How many TCP Segments are Queued? 18 ✓ Correct Answer Keep reading the output. How many "HTTP response headers" were extracted? 3 ✓ Correct Answer Investigate the mx-1.pcap file with the second configuration file. sudo snort -c /etc/snort/snortv2.conf -A full -l . -r mx-1.pcap What is the number of the generated alerts? ✓ Correct Answer 68 Investigate the mx-2.pcap file with the default configuration file. sudo snort -c /etc/snort/snort.conf -A full -l . -r mx-2.pcap What is the number of the generated alerts? 340 ✓ Correct Answer ♥ Hint Keep reading the output. What is the number of the detected TCP packets? 82 Correct Answer Investigate the mx-2.pcap and mx-3.pcap files with the default configuration file. sudo snort -c /etc/snort/snort.conf -A full -l . --pcap-list="mx-2.pcap mx-3.pcap" What is the number of the generated alerts? 1020 Correct Answer

Use "task9.pcap". Write a rule to filter IP ID "35369" and run it against the given pcap file. What is the request name of the detected packet? You may use this command: "snort -c local.rules -A full -l . -r task9.pcap"

#### Result:

Detection of real time threrats, analyse recorded traffic files and identify anomalies task is successfully completed.
